

DE LA ESPADA

OBJECTS WITH MEANING

The objects in our lives should be useful and beautiful, well thought through, and designed to last. As our experiences become layered memories, the reassuring presence of our valued possessions reminds us of our life's journey. Objects that connect with us originate from a place of connection: creators invested in the integrity of their craft, materials that appeal to the senses, consideration of the wider world. At De La Espada we build for life; furniture that ages well, with enduring relevance.

LUXURY IN THE DETAILS

There is no greater luxury than time and personal attention. It is the small moments that define the whole of our lives; likewise, a product is the culmination of its details. From our design partners to our craftspeople, there is a deep engagement with our furniture, and a mission to make it as beautiful and enduring as possible.

No detail is too small for consideration, from the particulars of joinery, to tactility, to decisions over how to apply each plank of wood to showcase the individuality of its colour and grain. We define luxury as experience, taking the time to enjoy the process of creation, and passing this pleasure on to those who spend a lifetime with our furniture.

AT HOME IN THE WORLD

De La Espada is deeply connected to Portugal, home to our dedicated factory and many of the people who pour passion and skill into creating our products. The warmth and history found in Portuguese design and architecture is present in our work, combined with an international perspective brought by our homes in London and New York, and our collaborators in Stockholm, Venice, Shanghai, London, New York, and Istanbul. We work closely with our design partners, combining expertise and exchanging cultures, friendships, and ideas. De La Espada furniture is where the creativity of some of the world's leading designers meets the highest level of European craftsmanship.

FOCUSING ON THE KEY PIECES OF FURNITURE FOR THE HOME:
A PLACE TO EAT, REST, SLEEP AND WORK

DESIGNERS

NERI&HU

Neri&Hu is an inter-disciplinary award-winning architectural design practice based in Shanghai, China, with an additional office in London.

With their product line, 'neri&hu' they seek alternatives to the normative, questioning the potential in 'Chinese design.' neri&hu is the reinterpretation of the beauty in the raw material, changing perceptions through what is revealed, examining history and its path, or capturing an ordinary scene in a snapshot.

LUCA NICHETTO

Luca Nichetto is an acclaimed Italian designer with offices in Venice and Stockholm. His work is informed by his collaborative approach to design and deep respect for craft across all disciplines.

For his product line, 'Nichetto' he creates products with personality, distinction and versatility. The pioneering yet classical forms highlight the unique characteristics of the premium materials and superior craft.

MATTHEW HILTON

Matthew Hilton is an esteemed British designer whose eponymous product line expresses the technical knowledge and clarity of vision gained over three decades in the industry.

Utilising robust materials that improve with the mark of age, Matthew Hilton creates timelessly beautiful, exceedingly functional products that are rigorously engineered. Every view of a design is valued equally, every aspect carefully considered, allowing for a sense of appreciation over time as new details are discovered.

STUDIOILSE

Ilse Crawford is a designer, academic and creative director with a simple mission to put human needs and desires at the centre of all that she does. As founder of Studioilse, together with her multi-disciplinary, London-based team, she brings her philosophy to life. This means creating environments where humans feel comfortable, public spaces that make people feel at home and homes that are habitable and make sense for the people who live in them. It means designing furniture and products that support and enhance human behaviour and actions in everyday life. It means restoring the human balance in brands and businesses that have lost their way.

AUTOBAN

Internationally renowned, Istanbul-based, multi-disciplinary design studio, Autoban creates statement furniture to further the story told through their architecture and interiors.

Each product is informed by a uniquely space-centric approach, blending wit with sophistication, and minimal forms with rich materials.

JASON MILLER

Jason Miller is an acclaimed American industrial designer based in Brooklyn, New York, where he runs both Jason Miller Studio and high-end contemporary lighting brand Roll & Hill. Miller creates lighting, furniture, accessories and interiors inspired by contemporary American culture, elevating the everyday through rich materials and reimagined forms.

Intricately detailed, Jason Miller furniture transcends time in forms that capture the sumptuous qualities of a traditional American aesthetic in a more modern design language.

PRODUCT GUIDE

Our product range reflects the diversity of our creative partners and the unity of shared values, materials, and craft, allowing you to easily combine products to create your own unique interior.

TIMBER

There is nothing quite like solid wood: reflecting the life of the tree, every plank has an individual beauty granted by its unique colours and grain patterns; it allows for the use of joinery as handsome as it is secure; it has a natural tactility and familiarity that connect to us in a true way; and it allows for the use of finishes that invite you to get involved in its care.

We exclusively use timber from sustainable farms. This not only makes environmental sense, the trees methodically replanted, but aesthetic sense as well: the regular pruning that occurs on these farms creates the highest quality planks with greater strength and fewer knots. Our finishes are carefully chosen to embrace and enhance the characteristics of the material, while offering a broad range of aesthetic possibilities.

Our oil finishes reveal the inherent colour and grain variations in the timber, whilst providing a renewable surface for enduring beauty.

Our oxidised timber employs an oxidising solution that reacts with the tannin in the wood, creating a beautiful patina. This is followed by a clear, matte lacquer.

Our stains and paints are available in a choice of ten colours. Stains are sealed with a clear matte lacquer to maintain the colour whilst preserving the silky touch. Our painted timber is wire brushed before the application of the paint, creating a textured surface.
